EXPERIENCE

Backend Engineer

Backbase

01/2026 - Present Guadalajara, México

- Designed and implemented scalable REST APIs and microservices, ensuring seamless data flow and optimal performance for front-end client applications.
- Streamlined deployment processes in cloud environments (Azure/AKS), contributing to a stable and continuous delivery pipeline for high-performing digital experiences.
- Partnered with Frontend and Mobile engineers to design and implement robust APIs, ensuring a seamless and responsive User Experience (UX).
- Collaborate with cross-functional teams (Solution Architects, Business Analysts and clients) to provide backend perspective and provide technical solutions.
- Manage project releases, including version bumps, configuration changes and release documentation.
- Optimize microservice reliability through proactive Grafana monitoring and comprehensive root-cause analysis of system failures.

Application Developer

Oracle

05/2025 - 08/2025 Guadalajara, México

- Enhanced user experience and overall stability for the Oracle Expense Fusion application by troubleshooting and resolving complex system bugs, ensuring high-performing and reliable digital interactions.
- Optimized data flow to the front-end by troubleshooting and resolving REST API endpoint issues using Postman, ensuring seamless cross-platform integration and accurate UI rendering.
- Promoted continuous improvement and technical standards by documenting bug resolutions, test cases, and solutions in Confluence, facilitating efficient collaboration across development teams.

Web Technical Lead

NXP Semiconductors

07/2024 - 04/2025 Guadalajara, México

- Partnered closely with UX designers to create and iterate mockups in Figma for upcoming web projects, ensuring design intent and technical feasibility remained aligned.
- Developed responsive, high-performing user interfaces using React and Bootstrap, integrated seamlessly with a custom Java/Spring Boot backend.
- Led data mining projects by querying and analyzing data from Teradata and a PostgreSQL database to provide insightful information to stakeholders for their decision-making processes.
- Developed a Spring Boot application using Java 21 to scrape data from NXP.com, and its UI using React and Bootstrap to provide users a way to create reports based on crawled data.
- Improved data pipelines using Python to extract data from APIs, transform, format, and save the data into a PostgreSQL database.
- Led the development and maintenance of an internal automation tool using Java 17, Spring Boot, and Selenium to continuously automate complex Content Management System processes.
- Mentored and trained junior team members, leading technical discussions and promoting continuous improvement across development workflows.

SUMMARY

Versatile and motivated Software Engineer with 7+ years of full-stack expertise, specializing in translating design intent into production-ready UI components and building modern, intuitive, and responsive interfaces. Proficient in JavaScript, React, and Next.js, backed by resilient backend architectures using Java, Node.js, Python, and Spring Boot. Experienced in API design and orchestrating Dockerized Linux environments to build scalable, high-availability applications that bridge the gap between user experience and robust technical performance.

English	Proficient
Spanish	Native

SKILLS

Software Development		Web Development		
Java	JavaScript	React	Next.js	
Node.js	Express	HTML5	CSS3	SASS
Redux	JQuery	Bootstrap	Spring Boot	
Grafana	JUnit	Jest	REST APIs	
Postman	Web Scrapping	Automation		
Selenium	SQL	PostgreSQL	MySQL	
SQL Server	Teradata	MongoDB		
Data Mining	Python	Pandas		
ETL Pipelines	Kafka	Docker	Git	
GitHub	Bitbucket	Microservices	Linux	
Microsoft Power BI	PHP	Windows Server		
JWT	AWS	AKS	Kubernetes	Vercel
Jira	Figma	ServiceNow	Adobe Workfront	

EDUCATION

Computer Engineering

Universidad de Guadalajara

2015 - 2019

EXPERIENCE

Web Publisher and Operations

NXP Semiconductors

📅 11/2020 - 06/2024 📍 Guadalajara, México

- Collaborated closely with business stakeholders to gather and translate web requirements into actionable digital experiences, maintaining alignment with front-end standards and organizational goals.
- Translated UX designs into scalable, reusable, and production-ready front-end components using HTML5, CSS3, JavaScript, and React.
- Designed and developed a custom Chrome extension utilizing React and Node.js, delivering out-of-the-box UI solutions to streamline daily publishing operations.
- Mined data from databases, warehouses, and APIs. Generated reports and delivered actionable insights for web teams and business lines, aiding strategic decisions.
- Developed a Spring Boot application using Java 17 and Selenium to automate repetitive tasks in the publishing processes, web asset cleanups, and fixing static content.
- Built a web application using PHP 8 and JavaScript to generate detailed Excel reports on web assets, extracting their data from Teradata, and sending the reports through email.
- Streamlined application delivery by deploying web services and scripts through Docker containers in a Linux environment.

IT Technical Support Specialist

Tata Consultancy Services

📅 06/2019 - 11/2020 📍 Guadalajara, México

- Collaborated with stakeholders to resolve ServiceNow incidents, identifying root cause and implementing fixes in Java 8 and PHP 7 web applications.
- Created runbooks for every production deployment that I made to maintain standardization, consistency, and foster better coordination between developers and IT.
- Participated in code reviews, testing code changes in QA and UAT environments, provided and received feedback through Bitbucket, created pull requests, and reviewed commits with Git.
- Resolved issues with SQL queries in MySQL and SQL Server, testing them in QA and UAT instances, and requesting approval for production deployment.
- Participated in an Agile team to develop new modules and features, providing estimated time, blockers, and next steps during Scrum ceremonies (dailies, planning, reviews, and refinements) to ensure transparent progress.
- Understand business requirements based on user stories and work along with business analysts to resolve doubts/questions.
- Efficiently resolved IT tickets in ServiceNow, meeting SLA commitments and ensuring prompt issue resolution.

TRAINING / COURSES

AI for All From Basics to GenAI Practice

An introductory course that provides invaluable insights into the evolving landscape of AI and how generative AI provides to enterprises with the compute power, tools, and algorithms.

React - The Complete Guide (Hooks, React Router, Redux)

A course to learn React from scratch, along with React Hooks, Redux, and Next.js, with exercises and practical projects.

Git Training: Step-by-Step Guide to Git Version Control

A course that teaches the fundamentals of Git, real-life scenarios, workflows, and practical exercises.
